

THE BLOOD/ALCOHOL LIMIT IS 0,05G PER 100 ML OF BLOOD. KNOW YOUR OWN LIMIT. WE CAN MAKE OUR ROADS SAFER, BETTER TOGETHER.

3 DRINKS STOP!

You may be
unfit to drive

2 DRINKS CAREFUL!

You may be over
or nearing your
personal limit

1 DRINK

Can affect
your ability
to drive

The blood/alcohol limit for motorists is 0,05g per 100ml of blood. Factors such as your age, weight and general health all count towards staying within the legal limit. For example: as little as 2 glasses of wine or 2 cans of beer in an hour could put you over the limit. If you drive over the limit, you will be charged by the Police. Worse still, if you kill someone while driving drunk, you'll be charged with culpable homicide and you'll face a prison sentence. Know your limit. Stick to it. Or appoint a designated driver. Let's be safe on our roads.
